

OFFICIAL COMMUNIQUE RESCHEDULING OF APIC 2020

This is in continuation to CPMA's last communication issued on 10th June 2020 regarding postponement of APIC 2020 which was scheduled in May 2020 in India to be hosted by CPMA.

Due to continued rise in new cases of corona virus impacting life of people across the globe and particularly in India, the time is still not appropriate to hold large gatherings.

Furthermore, an effective vaccine is yet to be developed.

APIC Steering Committee Members deliberated on likely date for the hosting of APIC. It was unanimously decided by steering committee members to postpone next APIC to 2022 in India. The situation would, however, be reviewed in early 2021 before announcing the exact dates for the two-day event of APIC and its venue.

The objective is to hold APIC as a face to face networking event at the earliest without compromising on health and safety of the delegates.

We look forward to your continued support.
